introduction

Welcome!
Thank you for choosing our product. It is a camera that could see your next room directly/locally. And once connected with your WiFi network (router), you could see it from anywhere in the world with internet access.

To help the users we especially creat a installation video demo in the disk included in the package. If you need help, or you have a feedback, please let us know! Enjoy the installation, enjoy the camera, we sincerely hope that.

IMPORTANT:
Please do not use this camera for illeagal purpose. And it is important to follow the law in your country/state.

Safety instructions

Please read these instructions before using the product.

- Since this product is controlled by a microcomputer chip, it is normal that system halt may occur if users operate it incorrectly. In this case, re-start the device.

- This product is neither waterproof nor dust proof, and therefore it can not be used outdoors or in adverse environment.

- Please adopt original DC power supply, to avoid causing device damage or electric shock or fire.

Safety instructions

- Unauthorized dismantlement of the device or replacement of device parts is forbidden. The manufacturer will not be responsible for any loss arising from such actions.

- Do not put the device into fire, oven or microwave oven, in order to avoid explosion.

- As a result of version changes, the user manual may be different from the real product. Please take the real product as the standard.

Trouble shooting

1. What is the wifi range? So can I view while i m at work from my phone? My work is 20miles away.
No problem for 20 miles!Once installed it as network camera, you could see it from anywhere in the world. The WiFi hotspot mode is for local view as 80 meters open distance.

2. What is the App's name so I can download it to my Android phone?
The app name is: Mini WIFI Cam.

Mini WiFi Cam

3. Will surveillance option work off of battery or does it need to be on AC adapter?

This camera doesn't come with a built-in battery,it need to work with ac adaptor using the mounting bracket.

4. How if I can't install it successfully, or there is some problem of my camera?

It is suggested to reset the camera, delete it from APP and re-install it. And do the samething as the installation video is also important.

Trouble shooting

5. I cannot get the camera to connect to my iPhone. It searches but never finds the camera. Do I just have a defective item?

Make sure you’re in AP mode and never find the cam.Pls re-set your wifi connection with the camera built-in hot spot. Normally it is too short time for this to happen.

6. Does the cam support RTSP or onvif?

This cam doesn't support RSTP or Onvif.
